Topic Multidisciplinary Integrative Homeopathic Therapeutics
(M.I.H.T)

Holder *Dora Maria Auxilia Oliveira Braganca*

**Back-
ground** On a Re-Reading of Homeopathy with the methodology
and principals of Freud, Jung, Steiner, Weil and Goethe
the holder derived a new system of prescribing a
sequence of homeopathic remedies (Lyc., Nux v., Phos.,
Sep., Nat. m., Aur).

It is based on defined potencies due to a concept of
understanding unconsciousness contents (as one of the
origins of disease by psychosomatic) in phases or stages
in the individuation process. It was reproducible and
proofed in 700 people as effective

Dora Braganca

NETWORKING
IN MEDICAL CARE
Collaboration for the
Benefit of the Patient

Open Space®

Result

Experience with this system showed:

Strengthening the physic an immunologic self

Providing a stimulus to the life-drive (life-instinct)

Mitigation of the unconscious contents pathogens

Repetition of marks in the memory

Reduction of the death-drive (destructive impulses)

Reduction of symptoms and disease

All cases were followed in their clinical and psychological evolution and the evolution of the dreams that showed the reproducibility of the process

Topic Microimmuno-Therapy a support to Homoeopathy?

Holder *Gunter Schlegel, Ina Chammah*

Back-ground If patients don't react to Homeopathy, Microimmuno-Therapy can be a possibility to bring them back into immune regulation.

Microimmuno-Therapy is a therapy using potentised cytokines.

The choosing of remedies is based on Lab-diagnosis of lymphocytes, serum proteins, serumtiters of various microorganisms and clinical symptoms.

Ina Chammah, Gunter Schlegel

NETWORKING
IN MEDICAL CARE
Collaboration for the
Benefit of the Patient

Open Space®

Result

Microimmuno-Therapy is able to reduce chronic inflammatory processes.

Microbiological and Microimmuno-Therapy are working synergistic to calm down chronic inflammation.

There is a strong influence of psychological factors and autoimmune diseases, therefore a combination of psychotherapy, MIT and Homeopathy is useful.

- Topic** Is there a meaningful way to group clinical studies of homeopathic interventions?
- Holder** *Katharina Gaertner*
- Back-ground**
- The practical benefit of previous reviews and meta-analyses in homeopathy remains unclear
 - due to the variety of homeopathic interventions and the limited transferability of homeopathic practice into experimental conditions
 - In order to find out in which pathological conditions beneficial results can be detected a subgroup classification for meta-analytical purpose was developed.
 - We wanted to test whether the proposal seems meaningful to a number of homeopathic doctors and whether studies can be allocated congruently to the subgroups.

Katharina Gaertner

NETWORKING
IN MEDICAL CARE
Collaboration for the
Benefit of the Patient

Open Space®

Result

- The proposal seems meaningful but needs refinement
- Too differentiated subgroups seem not to meet the indented objective
- Introducing the homeopathic concept seems to be favourable.
- The subgroups should rather focus on problems (outcomes) and prognosis then on pathology
- Tables of the studied outcomes will be developed
- An online survey might continue this process of evaluation of the subgroup proposal

Topic EVALUATION OF ROLE OF INDIVIDUALISED HOMOEOPATHY IN CASES OF COPD BASED ON 6 MINUTES WALKING TEST

Holder *Dr. VATSANA KASANA, , BHMS,MD,PhD*

Back-ground According to WHO it is estimated that COPD would be the 3rd leading cause of death worldwide by 2020 and yet there are so many questions unanswered to it.

Aim / Objective of the study:

The aim of the study was to evaluate the role of Homoeopathy in mild and moderate cases of COPD and the objective was to assess the usefulness of individualized Homoeopathy in cases of COPD by 6 Minute walking Test.

Vatsana Kasana

NETWORKING
IN MEDICAL CARE
Collaboration for the
Benefit of the Patient

Open Space®

Result

Significant difference was observed in pre and post 6 MWT (6 minutes walk test) after giving individualized homoeopathic treatment (P value < 0.001)

It can be inferred that individualized homoeopathic medicines are useful in the treatment of mild and moderate cases of COPD

Most commonly indicated and useful: Lyc, Ars alb, Kali carb, Amm carb, Sepia, ...

It is interesting to know that such good results could be obtained even when the patient did not discontinue smoking / cooking on biomass.

- Topic** Role of homoeopathy in autoimmune disease and complications
- Holder** *Dr. Krunal Kosada*
- Back-ground** My experience in a case of HUS (Autoimmune disease) with the complications of Pericardial effusion and Chronic Renal failure, and how i could intervene Homoeopathy in the Critical care unit.

Krunal Kosada

Open Space®

Result

The group came to the conclusion that Homoeopathy really works in long term management with the life threatening complications and has a role apart from the main stream medicine. Homoeopathy can play a supportive role when there is no scope in main stream medicine.

- Topic** AIDS/HIV BEING SUCCESSFULLY TREATED BY
HOMOEOPATHY
- Holder** *PROF. DR.S. Praveen Kumar*
- Back-ground** More than 15.250 patients with HIV are being treated in the Govt. Homeoeopathic Hospital in India. Many of them are really improving!
- After IN VITRO research by I.I.C.T CROTALUS HORRIDUS 30 was selected as the important remedy to treat HIV/AIDS Patients.
- So far 90% of patients subjectively improved
- In 976 patients CD4 increased beyond 600
- In 487 patients viral load became ZERO

Praveen Kumar

Open Space®

Result

There are no side-effects. The only problem is that many of the patients are poor and can't afford costly investigations because of which we have got only 4800 patients reports available.

The Govt. of Telangana, Govt. of India and CCRH are helping and supporting this project.

Topic Homeopathic treatment of palliative outpatients

Holder *Herbert Michalczyk, Germany*

Back-ground Incurable patients at the end of their lives are accompanied by a multi-professional SAPV-Team (specialised ambulant palliative care) at their homes. There are some typical indications to offer them homeopathic remedies, such as delirium, anxiety situations, vomiting/nausea/ileus, hydrops/aszites/pleural, breathing difficulties/rattling/dyspnoea, constipation, severe itching.

Herbert Michalczyk

Open Space®

Result

More practical experience is needed to establish a reliable choice of remedies and collect successful case reports. In the area of southern Germany/Bavaria a network of experienced homeopathic colleges is to be installed in order to offer homeopathy to palliative care units like hospices, palliative care units in hospitals and ambulant units.
